THE NEW GEM CITY BUSINESS COLLEGE

The Largest and Most Elegant Commercial College Building in America.

The building is 188 x 51 feet; five stories high, and is built in the most substantial manner, of stone, red pressed brick, terra cotta, iron and copper. It is furnished with steam heating, water, gas, electricity, and electric elevators. It is also supplied with speaking tubes and an electrical clock, which automatically rings the opening and closing of school and the entire programme of recitations for the day and week.

The light and ventilation are perfect, and the furnishing and appointments throughout this magnificent building are models for convenience, comfort and health.

There are 30,000 square feet of flooring space devoted to the school, with a capacity for seating 1,200 students; and it is confidently expected that there will be an attendance of 1,000 students in the new building the first year, beginning with the opening, September 12, 1892.
